### Engagement with Providers

1. **Regional Middle Mile Backbone Needed**
   - In June 2016, a meeting was held with CENIC, Cal Telehealth Network, and Marin Local Exchange Carrier (ILEC) AT&T California. The meeting focused on the need for a regional middle mile backbone to support the deployment of broadband services in the three counties.
   - In the following months, AT&T, Comcast, and Sonic have met with various providers, including Digital Path, Cal-Neva, SeaKay, Further Reach, and Valley Internet, to discuss potential solutions for improving service access and quality.

2. **Working with Major Providers**
   - A local exchange carrier (ILEC), AT&T California, has been very cooperative. The project team engaged AT&T and Comcast in discussions about potential solutions for improving service access and quality.
   - There was not much new information shared, Frontier, as a result of their strategic shift to focus on wireless services, agreed not to pursue a CASF grant. In Central-Inland counties, the team contacted US Cellular, but they decided not to pursue a CASF grant because they could not seek CASF funding.

3. **Focus on Selected Priority Areas**
   - In Marin, the focus has been on a 26-mile corridor between San Rafael and San Francisco to San Rafael and its access to Bragg/Westport.
   - In Humboldt County, the focus has been on a 9-mile corridor between Willowbrook and Fortuna.
   - In Sonoma County, the focus has been on a 10-mile corridor between Occidental (Greater Joy Road) and Fort Ross.

### Infrastructure Development

1. **Engage Community Leadership**
   - The North Bay North Coast Broadband Consortium (NBNCBC) has engaged community leadership in each county, including the counties of Marin, Humboldt, and Sonoma.
   - Each NBNCBC County Manager met frequently with his/her county leadership, including supervisors, county managers, and elected officials.

2. **Incorporate Needs into Countywide and Community-Based Plans**
   - The NBNCBC has worked with county governments and community-based organizations to incorporate broadband needs into countywide plans. In Marin County, the team met with the Marin County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.
   - In Humboldt County, the team met with the County Supervisor frequently, at least once a quarter, to discuss the progress of the project.
   - In Sonoma County, the team met with the Sonoma County Supervisor to discuss the progress of the project.

3. **Facilitate Adoption and Training Programs**
   - The NBNCBC has worked with local governments and community-based organizations to facilitate the adoption of broadband services and provide training programs. In Marin County, the team has worked with the Marin County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.
   - In Humboldt County, the team has worked with the Humboldt County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.
   - In Sonoma County, the team has worked with the Sonoma County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.

### Data Accuracy

1. **Priority Communities Identified**
   - The NBNCBC has identified priority communities, including Marin City, Fort Ross, and Gualala in Humboldt County, and Willowbrook, Gualala, and Fort Ross in Sonoma County.
   - The NBNCBC has worked with local governments and community-based organizations to incorporate broadband needs into countywide plans. In Marin County, the team met with the Marin County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.
   - In Humboldt County, the team met with the Humboldt County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.
   - In Sonoma County, the team met with the Sonoma County Supervisor to update on the work of NBNCBC, at least annually and in a couple cases twice in one year.

2. **Advisory Groups Are Invaluable**
   - The NBNCBC has worked with advisory groups to provide input on the prioritization of communities and the development of countywide plans.

3. **Public Safety, Government Agencies, and Media are Actively Engaged**
   - The NBNCBC has worked with public safety agencies and government agencies to provide input on the prioritization of communities and the development of countywide plans.
   - The NBNCBC has worked with media outlets to raise awareness about the importance of broadband deployment and access and adoption.
