

Broadband Providers in Mendocino County - as of January 2017

Disclaimer: This information is compiled to the best of our ability from advertised service areas - it will not always be accurate! *As an example*, Comcast goes out Albion Ridge Rd. 2 miles and does not go down the side roads except for C, D and F, leaving large areas of Albion outside the Comcast service area. Fixed Wireless needs an on-site assessment to determine definitively whether service is available. Please use this information as a *useful general guide only*, and contact individual providers to get final answers on service availability.

Satellite: any area in the county with a clear view of the southern sky may be serviced by satellite.

Please contact the Alliance at chairman@MendocinoBroadband.org with new information.

Company	Fiber	Wireline Copper/DSL	Fixed Wireless	Mobile Wireless	Satellite	Service areas
