

Providers by Area - as of May 2016

Disclaimer: This information is compiled to the best of our ability from *advertised* service areas - we guarantee it will not always be accurate! *As an example*, Comcast goes out Albion Ridge Rd. 2 miles and does not go down the side roads except for C, D and F, leaving large areas of Albion outside the Comcast service area. Fixed Wireless needs an on-site assessment to determine definitively whether service is available. Please use this information as a *useful general guide and starting point only*, and contact individual providers to get final answers on service availability.

Providers of dial-up internet are NOT listed in this chart.

Providers are not listed in any preferred order, and some may be missing.

Satellite: any area in the county with a clear view of the southern sky may be serviced by satellite. See Providers sheet for companies serving county.
