Broadband availability data collected by the California Public Utilities Commission (CPUC). The CPUC defines "broadband service" as Internet connectivity with download / upload speeds of at least 768 Kbps / 200 Kbps. Such service is considered "available" if the provider can provision new requests for service within 10 business days. Urban vs Rural defined by the 2010 Census urban/rural indicator by census block.

Household data from the California Department of Finance, January 1, 2016 estimate.
